SUBJECT: **GROUP HOME PROGRAM MONITORING REPORT – ETTIE LEE  
YOUTH AND FAMILY SERVICES, WATERFLOW RANCH GROUP  
HOME**

We have completed a review of Waterflow Ranch Group Home (Group Home or Agency) operated by Ettie Lee Youth and Family Services. The Group Home contracts with the Department of Children and Family Services (DCFS) and the Probation Department (Probation).

Waterflow Ranch Group Home is a twelve-bed facility, which provides care for boys ages 14-17 years who exhibit behavioral, social, and emotional difficulties. At the time of the monitoring visit, Waterflow Ranch Group Home was providing services for seven Los Angeles County probation children, and one Riverside County child.

Waterflow Ranch Group Home is located in Riverside County.

**Scope of Review**

The purpose of the review is to determine whether the Agency is providing the services as outlined in their Program Statement. Additionally, the review covers basic child safety and licensing issues, and includes an evaluation of the Agency's Program Statement, internal policies and procedures, child case records, a facility inspection, and interviews with children placed in the Group Home at the time of the review. Interviews with children are designed to obtain their perspectives on the program

*"To Enrich Lives Through Effective and Caring Service"*

services provided by the Agency, and to ensure adherence to the Foster Youth Bill of Rights.

### **Summary of Findings**

Generally, the Agency is providing the services as outlined in their Program Statement. The Group Home has deficient areas that need to be addressed.

The Group Home needs to make repairs to the exterior of the home; clean the kitchen floor and ceiling; repair the dining room floor tile; clean the carpeting throughout the Group Home; clean all of the shower doors; clean toilet seats and toilet stalls; repair the bathroom mirror and toilet paper holder; replace the window coverings; replace the bulletin board; clean the walls in the children's' bedrooms; provide children with a computer; develop a treatment team to implement the Needs and Services Plans with input from the child; and provide children with opportunities to participate in age-appropriate extra-curricular activities.

Attached is a detailed report of the review.

### **Review of Report**

We discussed our report with the Agency's management. In response to the recommendations made in the report, the Agency's management completed a corrective action plan (attached) which we approved. We thank the management and staff for their cooperation during our review.

If you have any questions, please contact me, or have your staff contact Mike Pirolo at (626) 293-1110.

**I. Facility and Environment**

**Method of assessment – Observation**

**Comments:**

Waterflow Ranch Group Home is located in a residential community. The front and back yards are clean, and adequately landscaped. However, the exterior of the Group Home is not well maintained, there are cracks on the outside of the house, and the wooden columns in front of the house are rotting.

Overall, the interior of the Group Home and common quarters are neat. There is adequate furniture and lighting in the Group Home. The Group Home provides a home-like environment. However, the kitchen floor and ceiling are dirty; the dining room floor tile is damaged; the carpeting throughout the Group Home is dirty and stained; the shower doors, toilet bowl and toilet stalls are dirty; the toilet seats are worn; a bathroom mirror has permanent writing on it; and there is a broken toilet paper holder.

Children's bedrooms are orderly, and have age-appropriate personalized decorations. There is adequate furniture, lighting, and storage space. However, there is permanent writing on a bulletin board in bedroom three, and writing on a wall in bedroom seven. The mattresses are comfortable, and the beds all have a full complement of linens. Window screens are in good repair; however, there are no window coverings in bedrooms three and nine. In bedroom six, the window coverings are dirty. Children's sleeping arrangements are appropriate.

The Group Home maintains age appropriate and accessible recreational equipment. There are also board games, a TV, and a DVD player. Books and resource materials are also available. However, the Group Home does not have a computer for the children's use.

The Group Home maintains a sufficient supply of perishable and non perishable foods.

## **II. Program Services**

**Method of assessment – Review of relevant documents and interviews**

**Sample size for interviews: Two**

### **Comments:**

The children meet the Group Home's population criteria as outlined in their Program Statement. The children are assessed for needed services within thirty days of placement.

One child has not been at the Group Home long enough to require a Needs and Services Plan (NSP). The other child's NSP is current, comprehensive, and includes long and short-term goals. However, the treatment team does not develop and implement the Needs and Services Plans with input from the placement worker and the child.

Case files reflect adequate documentation to show that the child is receiving treatment services.

### **Recommendation**

- 2. Ettie Lee management include the children and their placement workers in the development and implementation of the NSPs.**

## **III. Educational and Emancipation Services**

**Method of assessment – Review of relevant documents and interviews**
